

What is Claimed is:

1. A method for dispatching postal parcels comprising the following steps:
 - (a) inputting a delivery address for the delivery of the postal parcels;
 - (b) changing at least one of (i) the delivery address according to a routine predefined by the recipient, and (ii) the delivery address as a function of free compartments of at least one parcel compartment system; and,
 - (c) delivering the postal parcels to the changed delivery address.
2. The method of claim 1, further comprising assigning a recipient identification code to a recipient, wherein the code is linked to the delivery address.
3. The method of claim 1, comprising carrying out the delivery step (c) as a function of data contained in a table.
